JavaScript: ES6+, asynchronous programming

UI/UX & Styling: CSS3, SASS, Bootstrap, Material-UI

API Integration: RESTful APIs, GraphQL,

Axios, Fetch API

Testing & Debugging: Jest, React Testing

Library

Version Control: Git, GitHub, GitLab

Project Work

Smart Home Automation System

The Smart Home Automation System is designed to control and monitor household appliances (lights, fans, AC, door locks, CCTV, etc.) remotely using smartphones, voice commands, or automated schedules. The system integrates IoT (Internet of Things) devices with a central controller to provide convenience, energy efficiency, and enhanced security. Users can manage devices via a mobile app, web dashboard, or smart assistants like Alexa/Google Assistant.

Experience:

Full Stack Developer AI-Driven Career Guidance & Skill

Assessment Platform

06 Feb 2025 - 21 Feb 2025

- Developed a full-stack web application that evaluates user skills through interactive assessments and provides personalized career recommendations using AI.
- Designed and implemented secure authentication (JWT, bcrypt) with role-based access control.
- Built RESTful APIs for assessments and AI-powered career suggestions (Next.js API routes + FastAPI microservice).

Certifications
